Software Development Engineer Intern | Java · Spring Boot · React · Next.js · DSA

SUMMARY

Final-year CS Engineering student who builds and deploys full-stack applications end-to-end: Spring Boot and Next.js backends with JWT/role-based authentication, relational schemas in PostgreSQL, payment integration, and LLM-backed features, with three projects shipped on GitHub and two live on Vercel. Solved 80+ DSA problems across LeetCode and NeetCode.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), TypeScript, Python
Backend: Spring Boot, Spring Security, JPA/Hibernate, Next.js Server Actions & API Routes, REST API Design, JWT Authentication, Auth.js
Frontend: React.js, Next.js, Tailwind CSS, Responsive/Cross-Browser UI
Database: PostgreSQL, Prisma ORM, Supabase
CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Tools: Git, GitHub, Docker, Postman, Maven, Vercel, Render
AI Tools: ChatGPT, Claude, Gemini, LLM API integration

EDUCATION

B.Tech in Computer Science & Engineering | Dronacharya Group of Institutions, Greater Noida | CGPA: 7.0/10 — Expected Graduation: 2027
JEE Main 2023: 96.7 percentile (AIR 41,652)

EXPERIENCE

Data & AI Intern | Ministry of Panchayati Raj, Government of India **On-site, New Delhi · Sep 2026 – Present**
- Work alongside senior developers on MoPR's website chatbot and a complaint portal for panchayats across India.
- Organize and manage panchayat-level datasets in a systematic, structured way, using ChatGPT, Claude, and Gemini to support the work.

Frontend Developer Intern | Alfido Tech (Online) **Jul 2026 – Aug 2026**
- Shipped 6+ production React components, converting design specs into responsive, cross-browser-tested interfaces.
- Merged 15+ PRs across 4 sprint cycles in a Git-based team code-review workflow.

Web Developer Intern | Brainwave Matrix Solutions (Hybrid) **Sep 2024 – Nov 2024**
- Built 8+ pages and 5+ reusable UI components from raw requirements; debugged layouts across Chrome, Firefox, and Safari.

PROJECTS

Flapboard — AI-Powered Adaptive Typing Platform | Live: typing-master-pied.vercel.app | GitHub
Next.js, TypeScript, Spring Boot, Spring Security, PostgreSQL, JPA/Hibernate, JWT, Docker, LLM API
- Built a Spring Boot REST API with JWT authentication and PostgreSQL persistence for user accounts, typing sessions, and progress history; containerized the backend with Docker.
- Developed a typing engine with real-time WPM and accuracy tracking, a performance dashboard, and an adaptive module that generates targeted drills from past weaknesses.
- Integrated a live LLM API that turns structured performance metrics into personalized coaching, keeping calculations in deterministic code and using the LLM only for explanation.

Golf Charity Platform — Full-Stack Fundraising Platform | Live: golf-platform-gn.vercel.app | GitHub
Next.js, TypeScript, Supabase, PostgreSQL (Neon), Prisma, Razorpay, Zod
- Built a role-based platform (donor, organizer, admin) with Supabase auth and server-side authorization on protected routes and actions.
- Implemented organization registration with document upload and an admin verification workflow, plus campaign management and donation tracking.
- Designed a relational schema (Profile, Organization, Campaign, Donation, Payment) in Prisma/PostgreSQL; integrated Razorpay for donation payments with transaction tracking.
- Added AI-assisted campaign writing and search with Zod-validated structured outputs grounded in database records.

HireTrack — Recruitment Management Platform (ATS) | GitHub: github.com/Gaurav18071/Hiretrack-ai
Next.js, TypeScript, Prisma, PostgreSQL (Neon), Auth.js, bcrypt, Zod, shadcn/ui
- Built credentials-based authentication with bcrypt password hashing and protected dashboard routes, with recruiter-scoped job creation and listing.
- Designed a relational schema (User, Job, Candidate, Application) with a unique candidate–job constraint to prevent duplicate applications, and per-application hiring stages (Applied → Screening → Interview → Offer → Hired/Rejected).

ACHIEVEMENTS & LEADERSHIP

- **Problem Solving:** 50+ DSA problems on LeetCode and 30+ from the NeetCode roadmap.
- **Smart India Hackathon 2024 — Team Leader:** Led a team of 6 whose solution was selected for the college SIH submission; coordinated planning, task allocation, and development.
- **TechnoXian Line Follower Robot Competition:** Contributed to the robot's programming.
- **Class Representative;** helped organize a college cultural event for 200–300 students and faculty.
